Here are about 2,230 publications from 1822–2012. Most of them are used in this book. The earliest major paper devoted to the American Crow was by Frank Burns (1895) in *The Wilson Bulletin*. The authors' names are arranged alphabetically, but I use a 3-digit identifier for each name in the text. For example, within the three parts of **A**: a22, 22a and 2a2, the numbers 01–99 are used for each letter **A** through **Z** (lower case).
